

NEW EARLY MIDDLE-AGE DISCOVERIES AT BLANDIANA (DISTRICT OF ALBA)

SUMMARY

The article presents pottery and iron objects discovered on the Mureş river-side, near the village Blandiana. Besides the funeral inventory of a grave with skeleton partially destroyed (two vessels and an iron knife) there are described other four vessels and an iron point of arrow, found fortuitously in the years 1979—1980. The pieces, together with older discoveries, prove the existence of a cemetery from the IXth—Xth century A.D.
