

**A FEW CONSIDERATIONS REGARDING CERTAIN NEW ARCHEOLOGICAL MATERIALS  
DISCOVERED AT CĂLANUL NOU "LA PODINĂ" (HUNEDOARA DISTRICT)**

(SUMMARY)

This paper deals with the problems raised by certain archeological materials discovered after many surface researches completed in the settlement from Călanul Nou - "La Podină".

Having in view the cultural chronological system developed by Gh. Lazarovici (LAZAROVICI 1984) the author of this study suggest that this site should be included in the IIIA phase of the Starčevo-Criș culture.

The author, eventually, having in view I. Paul's cultural-chronological system (PAUL 1989) includes this site in passing phase from Precriș Culture (Protosesklo Horizont) to Criș Culture proper.
