

Medical manuscripts and incunabula in the Batthyaneum library

S u m m a r y

It is given a list of 45 mss and 28 incunabula with old medical contents which are in the Batthyaneum library from Alba Iulia.

In addition the author makes some remarks upon this matter, as one who was working a complete catalogue (not yet printed) of whole old medical prints from this library (about 2 000 books).
