

A NEW SETTLEMENT BELONGING TO THE LIVEZILE GROUP DISCOVERED IN THE MÂNĂȘTIRII GORGE (ALBA COUNTY)

(SUMMARY)

The paper is presenting a new site, located in the western part of Transylvania, which came out by chance, during the works for a new road. Most of the site was destroyed, but the pottery found is typical for the Livezile group, which marks the beginning of the Early Bronze Age in this area.
