

SOME TYPES OF NEW TEGULAR STAMPS WHICH HAVE  
RECENTLY BEEN FOUND IN APULUM

(SUMMARY)

We present some tegular stamps which have fortuitously been discovered in *Apulum*, in the last time. They belong to the private handicraftsmen: *Publius Aelius Tertentius -entianus*; *Publius Cl... Ot... / Legio XIII Gemina* sive *Publius C... Lo... Legio XIII Gemina*; *Pr... (nomina) Cos... (cognomina)* and *Antonius Rufinus*.

The governor's on the watch and escort troops also appear in an abbreviate form: *Ped(ites) Singulares* and *Singulares* and they represent new types, too.

The presence of the XIIIth Gemina Legion's stamp beside the local private artisan's name on the same roofing, it is remarkable.
